3. How the three components connect

```
import React from "react";
import {
  ProjectHub,
  SceneBuilder,
  ShotStudio
} from "./FramePlanComponents";

function FramePlanApp() {
  const projects = [
    {
      id: 1,
      title: "The Last Summer",
      description: "A short film about two friends.",
      type: "Short Film",
      scenes: 2,
      shots: 4,
      progress: 60
    }
  ];

  const scenes = [
    {
      id: 1,
      number: 1,
      title: "The Meeting",
      description: "Two characters meet.",
      location: "A cafe",
      shots: []
    }
  ];

  const shots = [
    {
      id: 1,
      number: 1,
      title: "Opening Shot",
      description: "Introduce the location.",
      size: "Wide Shot",
      angle: "Eye Level",
      movement: "Static",
      notes: "Keep the camera steady."
    }
  ];

  return (
```

```
    <main>
      <ProjectHub initialProjects={projects} />

      <SceneBuilder initialScenes={scenes} />

      <ShotStudio initialShots={shots} />
    </main>
  );
}

export default FramePlanApp;
```
